

Vraj Gami, B.Sc

gami@unbc.ca | github.com/VrajGami | gamivraj.com | linkedin.com/in/vraj-gami

Professional Summary

Information Security Analyst and Cloud Architect with experience in designing secure enterprise systems, managing incident response, and implementing compliance frameworks. Proven expertise in Windows Server environments, network security, and automated vulnerability management. Skilled in bridging the gap between technical security operations and organizational policy to ensure data integrity and regulatory compliance.

Employment History

2024 – Present

■ **Research Assistant (Security & Infrastructure)**, Business Intelligence Research Group (BIRG), UNBC

- Architected **secure, high-availability cloud infrastructure** on **AWS**, implementing strict **IAM policies**, network segmentation, and **WAF** rules to protect sensitive research data.
- Managed **MSSQL security**, implementing **Role-Based Access Control (RBAC)**, auditing logs, and encryption at rest to ensure data integrity and compliance.
- Led security automation initiatives using **CI/CD** and **CloudFormation** to enforce compliance, perform static analysis (SAST), and ensure secure software supply chains.
- Developed and maintained secure cross-platform systems using **.NET Core** and **Angular**, adhering to **OWASP** secure coding practices.
- Conducted **security awareness training** and user testing to ensure stakeholder adherence to information security policies and procedures.
- Engineered secure **ETL pipelines** for patient forms and IoT data, ensuring end-to-end encryption and compliance with health data privacy standards.
- Coordinated incident response drills and maintained project documentation, including security runbooks and disaster recovery plans.

May 2025 – Oct 2025

■ **Data Integrity Analyst**, School of Planning & Sustainability, UNBC

- Ensured **data integrity and security** for large-scale ETL pipelines handling over 150 GB of sensitive hierarchical data.
- Implemented **fault-tolerant workflows** with comprehensive logging and monitoring to facilitate **incident investigation** and root cause analysis.
- Authored detailed **security runbooks** and onboarding documentation to support system maintenance, auditing, and cross-team knowledge transfer.
- Optimized data processing performance by 75%, reducing exposure windows and ensuring timely availability of analysis-ready datasets.

2022 – 2024

■ **Part-Time Associate**, TJX Canada

- Awarded **Employee of the Month**; demonstrated strong interpersonal skills and maintained confidentiality while handling sensitive transactions.

Education

2022 – current

■ **B.Sc., University of Northern British Columbia, Canada** in Computer Science

Skills

Security & Compliance

■ Incident Response, Risk Assessment, ITIL, OWASP Top 10, Vulnerability Scanning, Encryption (TLS/SSL), IAM, WAF, Security Groups, Shield

Skills (continued)

Cloud & DevOps	■ AWS (Compute, Storage, Serverless, Networking, Monitoring, Databases, IaC), CloudFormation, CI/CD (Secure Pipelines), Docker, Kubernetes, IIS, Environment Monitoring
Programming	■ Python, C#, Java, C/C++, Dart, JavaScript/TypeScript, SQL, Shell Scripting, Haskell
Frameworks & Tools	■ .NET Core, Angular, Flutter, React, Node.js, Git, Linux (Kali/Ubuntu), Postman, Wireshark, Nmap, Active Directory, Group Policy
Data & Analytics	■ Power BI, Tableau, Jupyter Notebook, Data Visualization, ML (scikit-learn, TensorFlow basics)
Databases	■ MSSQL (Security/Auditing), PostgreSQL, SQLite, Redis, NoSQL, ETL Pipelines
Languages	■ English, Hindi, Gujarati

Certifications

- **AWS Certified Solutions Architect** (In Progress). Amazon Web Services.
- **Git and GitHub Certificate**. Coursera. [🔗](#)
- **Configuration Management Certificate**. Coursera. [🔗](#)
- **CS50: Introduction to Computer Science**. Harvard University. [🔗](#)

Projects

Personal Projects	■ AI-Powered Note-Taking Application (Flutter, .NET, SQL Server) Intelligent note-capture platform with speech-to-text transcription, automatic summarisation, and AI-assisted organisation for structured note management. USB Security Research (Raspberry Pi Pico, Python) Ethical HID-emulation tooling for endpoint security testing, including documentation of mitigations and testing workflows. IDVance (Django, OpenCV, QR Code) Attendance automation using facial recognition for identity verification and QR codes for fallback validation; designed for secure, frictionless check-ins. Q-Learning Pathfinding (Java, Multithreading) Reinforcement-learning prototype for optimized pathfinding with concurrent agents, demonstrating scalability and efficiency improvements.
Coursework Projects	■ Hospital Executive Dashboard (Power BI, Figma, DAX) Designed a multi-domain BI solution covering Patient, Operational, and Financial analytics using Figma-based prototyping and interactive KPIs. Airline Operations Database (SQL, DBMS) Normalized relational schema for scheduling and bookings with query optimization and strong integrity constraints for high-volume reporting. AI vs. Human Classification (Data Mining, NLP) Text-classification pipeline distinguishing AI and human authors, evaluated using standard accuracy and precision metrics.
